

I can't hear, so please turn it up!

TRY THIS - Next time you are watching TV turn the volume down so you can hear the program but with difficulty. Then watch the show.

Every time there is a background noise or other distraction you will miss part of your show. You will struggle to pay attention. You will get frustrated!

This is how some students spend their day in the classroom. Struggling to hear, missing parts of your lesson, being distracted and getting frustrated!

Soundfield technology is one of the best learning tools for mainstream education, benefiting both the students and teacher. It's like having the TV loud enough to clearly hear.

For more information on how to turn your volume up, go to <http://www.precision-acoustics.com.au/products/soundfield-systems>
