

Test and Tag

All employers are required to ensure that employees are safe in the workplace, this includes the common use of electrical equipment in an office or health-care environment.

Are all of your electrical items up to date ?

In accordance with the Australian Standards AS/NZS 3760 all Electrical Equipment used in Laboratories, Health-care, tea rooms, office kitchens and an office environment where the supply flexible cord is subject to flexing in normal use are to be **inspected and tested every 12 months**.

What is involved?

The Australian Standards AS/NZS 3760 "specifies in-service safety inspection and testing protocols and criteria that satisfy these obligations and provides a cost effective approach to safety without jeopardizing personnel safety or involving excessive equipment downtime."

A competent person must inspect equipment for visual and physical damage and also test the earthing continuity and complete an Insulation test.

How can I arrange this?

Precision Acoustics have qualified and experienced personnel that can Test & Tag all of your office equipment in a cost effective manner causing minimal equipment downtime, contact us for a free quote or more information.
